## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-5 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3 of U.S. Patent No. 6,689,139 in view of Tom Du Toit (USPN 5413,579). The patent claims the same patentable invention as recited in the present application with the exception being that the present invention recites a jig having a "substantially rectangular longitudinal cross-section" and further comprising "a cutting slot disposed diagonally across the jig body and extending from the top surface to the bottom

surface". The '579 patent to Tom Du Toit teaches in Fig. 1 a cutting guide or jig 10 with a substantially rectangular longitudinal cross-section comprising a cutting slot 18 disposed diagonally across the jig 10 and extending from the top surface to the bottom surface of the jig 10. As to Claim 2, the differences between the '139 patent and the present invention recited in claim 2 is the present recitation of "a flat portion adjacent to each of the sides on the bottom surface" whereas the '139 claims "a flat portion adjacent one of the leg on the bottom surface". It would have been obvious to one having ordinary skill in the art at the time of the invention to incorporate more than one flat portion into the invention patented in the '139 patent, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8. Regarding Claim 4, Fig. 1 of Tom Du Toit shows one hole disposed at the first end and the second hole disposed at the second end of jig 10. It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate the teachings of Tom Du Toit into the '139 patent in order to provide a jig device more adapted to assist in making a variety of cuts depending on the area of the body.
